

reMYND is a biopharmaceutical company focused on the development of treatments against protein-misfolding disorders, with two business units:

**The Drug Discovery and Development (DDD) unit**, driving our own pipeline of disease-modifying treatments against diabetes, Alzheimer's, Parkinson's and orphan diseases

**The CRO unit**, a world-wide leader of preclinical Alzheimer's disease contract research in our proprietary transgenic mouse models

### Open position: Quality Associate

#### Your role:

To provide quality support to reMYND's activities at the DDD and CRO unit:

- Reviewing in-vivo and in-vitro studies from start to finish: documentation and data analyses
- Preparing and realizing study- and process-based quality inspections, follow-up with operators and study directors
- Managing lab and facility related equipment: keeping databases and log books up to date; coordinating (internal and external) validation, calibration, maintenance and corrective efforts
- Managing non-conformities: active participation in and evaluation of root cause investigations; impact assessments (MEA) and corrective and preventive actions (CAPA)
- Supporting the optimization of quality-related business processes e.g. implementation of new equipment & database systems
- Supporting further realization of safety and animal welfare standards including maintaining as SDS and chemical inventory
- Working in a team of equal minded colleagues under the supervision of the Quality Manager
- Planning your own activities on a weekly basis in order to deliver committed results

#### Your background, skills and attitude:

- Holder of a bachelor or master's degree in biology, bio-medical science or biotechnology
- General knowledge of quality guidelines (GLP) with initial experience in a quality position is a plus
- A result oriented, outgoing attitude with a high level of energy; able to work closely in a team; eager to learn
- Familiar with MS Word and an advanced MS Excel user
- Fluent in Dutch and English
